DETAILED ACTION

Claim Rejections - 35 USC § 102/ 35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-50 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nishikawa et al. This reference discloses in col. 4, lines 5-65 a method of plasma polymerization comprising plasma polymerizing a mixture of a substituted hydrocarbon, oxygen, carbon dioxide, ammonia and argon. It is the examiner's opinion that applicant's claims are anticipated by the reference. The resulting coating of the reference would be inherently polar and stable in the long term if the same is true of applicant's coating. The reference gases would also be inherently water-free.
